Profile

I am a highly competent and enthusiastic undergraduate with a strong academic background and exceptional technical skills. Possessing a passion for continuous learning, I have cultivated my self-learning capabilities and adaptability to stay at the forefront of advancements in the field of software engineering. As an outgoing and collaborative team player, I excel in fostering effective communication and building strong working relationships. I am currently seeking for an Software Engineering internship opportunity to further apply and expand my knowledge in a professional setting.

Education

BSc (Hons) in Information Technology

Projects

Unified Project Workspace (Group)

The Unified Project Workspace is a responsive web application built to optimize collaboration among employees in association with IKON Marketing for the Level 2 software project. I currently work as the project team leader and a full stack developer.

Technologies: Typescript, React, NodeJS, Tailwind CSS, Express JS, MySQL

Personal Portfolio Website (Individual)

My personal portfolio web page is a responsive static web page featuring smooth Framer Motion animations, with integrated email functionality and CV download option.

Technologies: NextJs, Typescript, Tailwind CSS

SLUG Live Score Platform (Group)

Developed the SLUG Live Score Updating Platform for MoraSpirit, providing real-time updates of matches during the prestigious SLUG tournament. Responsible for building responsive, interactive frontends.

Technologies : React, PHP, MySQL

Done With It (Individual)

Developed a user-friendly mobile app that allows users to sell used items they no longer need. Features include login/logout facilities, map functions, push notifications, and more.

Technologies : React Native

Technical Skills
